Summary

Motivated B.Tech Computer Science student specialising in Data Science, with knowledge of Java, Python, SQL, DSA, and Web Development. Strong problem-solving and analytical skills with a focus on continuous learning and practical application of technical skills.

Education

B.Tech in Computer Science Engineering (Data Science) **2024 - 2028**
Galgotias University. **CGPA:** 8.4/10 Greater Noida, India

Senior Secondary Education **2022 - 2024**
Dharamdev Inter College, Gopalganj (BSEB)

Secondary Education **2021 - 2022**
Dharamdev +2 High School, Gopalganj (BSEB)

Skills

Programming Languages: Java(DSA), Python, HTML, CSS, SQL

Frameworks & Libraries: NumPy, Pandas, Matplotlib, OOPs

Databases & Tools: MySQL, GitHub, VS Code, Power BI, Jupyter, Linux

Coursework: Data Structures, Problem Solving, OPPs, Operating Systems, DBMS

Soft Skills: Problem solving, Leadership, Time Management, Communication, Task Management, Basic Computer Skills

Projects

QuickBasket **Aug – Oct 2026**

SKILLS: Java (Core), JDBC, MySQL, HTML/CSS, JavaScript, Apache Tomcat.

- Developed a full-stack grocery delivery application where users can register/login, browse products, view details, add products to cart, manage quantities, place orders and view order history.
- Implemented an Admin Panel with role-based access, allowing the admin to add, view and delete products, while restricting product management features for normal users.
- Added an Emergency Essentials Mode to help users quickly find essential products such as water, milk, first-aid, hygiene items, and baby essentials for urgent orders.

Fake News Detection **April – June 2026**

SKILLS: Java (Servlets), JDBC, MySQL, HTML/CSS, JavaScript.

- Developed a full-stack web application to classify news articles as real or fake, building a data cleaning and preprocessing pipeline to improve input quality.
- Designed a responsive front-end interface for article submission and result display, backed by a Servlet/JDBC/MySQL data layer.
- Applied modular design and systematic debugging to deliver a stable, end-to-end classification workflow.

Certification

- Data Engineering on AWS** — Amazon Web Services (AWS) **April – June 2026**
- Database Programming with SQL** — Oracle Academy **Jan 2026**
- Java, Servlets & JSP** — GUVI | HCL **Oct 2025**
- C Programming** — GUVI | HCL **Dec 2024**
